

Phases of the Moon Project

You will be completing a visual model of the moon phases! I encourage you to be creative in your display!

As we discussed in class, the phase of the Moon is the shape of the lighted part of the moon that we can see at any given time. Your job is to create a visual to represent this! You may use any object that will accurately show the various phases of the moon such as: Oreo cookies, circular crackers with peanut butter, cookies with frosting, ect. Use your imagination! Try to think outside of the box and not just do something you have completed before.

Requirements:

- *Accurately depict all eight phases as shown in your textbook.
- *Correctly label each phase as well as the entire model.
- *Be creative in you representation – NO DRAWINGS WILL BE ACCEPTED!
- *Keep your project neat and have fun!!!
- * Project is due Wednesday, January 6 2015
